**DETAILED ACTION**

***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-9 are drawn to composition comprising 5-methoxytryptamine, classified in class/subclass 514/416.
- II. Claims 10-12, 28 are drawn to method of preventing tissue damage, classified in class/subclass 514/416.
- III. Claims 13-15, 29 are drawn to method of treating tissue damage, classified in class/subclass 514/416.
- IV. Claims 16-18, 21, 24 are drawn to method of treating cardiac toxicity, myocardial ischemia, myocardial infarction, or heart failure, classified in class/subclass 514/416.
- V. Claims 19-20, 30 are drawn to method of increasing the activity of superoxide dismutase enzyme, classified in class/subclass 514/416.
- VI. Claims 22-23, 31 are drawn to method of inhibiting lipid peroxidation, classified in class/subclass 514/416.
- VII. Claims 25-26 are drawn to method for reducing levels of creatine kinase-MB, classified in class/subclass 514/416.
- VIII. Claims 27, 32 are drawn to method of reducing levels of lactate dehydrogenase, classified in class/subclass 514/416.

The inventions are distinct, each from the other because of the following reasons:

Art Unit: 1617

Inventions I and II, III, IV, V, VI, VII, VIII are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, 5-methoxytryptamine can be used as a potentiator for hypnotics and sedatives.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper. Because these inventions are distinct for the reasons given above and the search required for Invention I is not required for Invention II, III, IV, V, VI, VII, VIII, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement is traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

A telephone call to the attorney is not required where: 1) the restriction requirement is complex, 2) the application is being prosecuted pro se, or 3) the

Art Unit: 1617

examiner knows from past experience that a telephone election will not be made (MPEP § 812.01). Therefore, since this restriction requirement is considered complex, a call to the attorney for telephone election was not made.
